

Welded Base Plate Post

Our welded base plate post is ideal for installations where digging a foundation is not suitable.

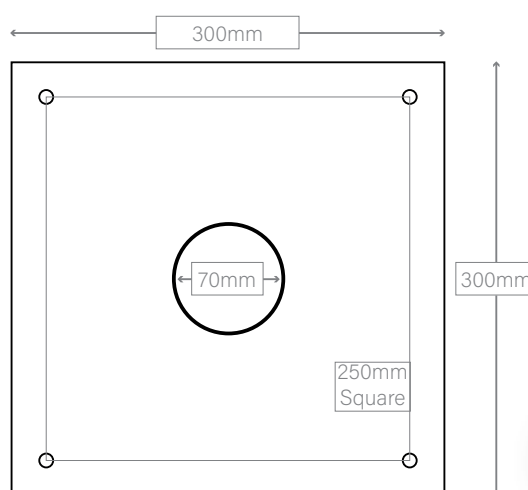

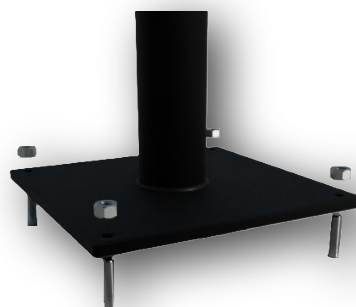

76mm diameter posts with a welded 300 x 300mm baseplate incorporating 4 mounting holes for bolting to surface.

The base plate consists of 4no. 12mm pre-drilled mounting holes set at 250mm square with pre-cut access hole to allow cable feeding if required.

All manufactured in house and quality controlled. Our powder coating meets or exceeds BS EN 12206-1:2004 and is available in Black or Traffic Grey as standard.

Key Features:

- Easy installation - no foundations required
- Pre-fitted post cap to prevent water ingress
- Powder coated for a professional finish
- No requirement for Civil Engineers
- Suitable for use in multi-storey car parks, installation will not affect waterproof membranes

Item	Description
Steel Grade	S275
Weld Type	Fillet welded (8mm throat thickness)
Finish	Powder coated satin finish (Traffic Grey or Traffic Black - specific RAL options available)
Post Diameter	76mm
Base Plate Dimensions	300x300x10mm (LxWxD)
Fixing	4no. pre-drilled 12mm diameter holes at 250mm square
Length	Available 1.0m up to 3.5m in 500mm increments
